

SYNTHETIC ISOPRENE RUBBER SKI-3S

Applications

SKI-3S is a general purpose rubber suitable for the production of tyres and engineered rubber goods. It is used alone and in blends with other general purpose rubbers as a substitute for natural rubber for manufacturing colored articles (including those for food and medical applications).

TYPICAL VALUES

Mooney viscosity MB, 1+4 (100 °C)	72-84
Viscosity spread within a batch, max.	8
Ash content, %, max.	0.35
Loss of mass at drying, %, max.	1.20
Antioxidant content, %, min.	
Agidol-1	0.5-1.3
Or Agidol-2	0.2-0.6
Lavinox 22M-46	0.2-0.6
Ralox 46	0.2-0.6
