

Think your HTF systems are performing well? Be certain with Fluid Genius™.

Your heat transfer fluid system is just one of many components that enable your plant to run smoothly and meet your product yield goals. Most systems should be sampled annually as well as whenever a fluid-related problem is suspected. Failing to actively maintain HTF systems can have costly and significant consequences, including unplanned downtimes, reduced product yield, negative impact on product quality, damage to critical equipment, and safety incidents.

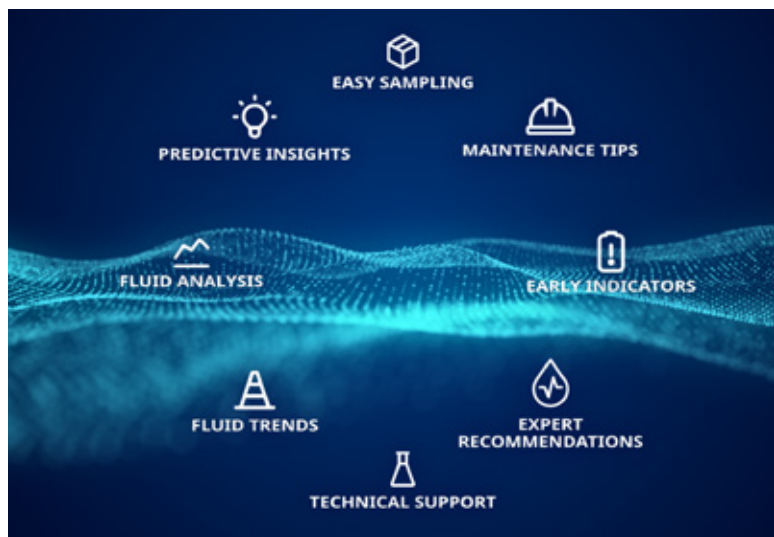

Fluid monitoring you can trust

Knowing your HTF system is operating efficiently has never been better than with Eastman's Fluid Genius digital maintenance platform. Backed by Eastman HTF and engineering experts, Fluid Genius was designed with your operational concerns in mind. Fluid Genius provides you with results you can see and real actions you can take to protect your operations and production schedules.

- Advanced fluid analytics—Analyze your system's fluid condition, remaining life, and historical performance to take advantage of the earliest warning signs.
 - Expert technical support—Access tailored recommendations, backed with more than 50 years of market-leading technical experience and state-of-the-art analytical labs.
- Heat transfer fluid information—Keep HTF expertise within reach for a quick refresher or review with new team members through the online knowledge base.
 - Automatic sample kit delivery—Make sampling easier. Fluid Genius offers free annual sampling, automatic kit deliveries, and reminders.

Powerful analytics provide better insight into your fluid performance and maintenance needs.

All-in-one application

Contact your Eastman account manager or distributor to create your account today. Then order your sample kit to begin your experience!
